

SAI CONSULTING

Architectural Designs and Construction Drawings

April 17, 2009

I have been working with Jim for almost 4 years now on a variety of projects. In my capacity as an Architectural Technologist completing services in design, plans preparation, plans examination and permit acquisition I can attest to Jim's attention to detail, his ability to understand the scope of the project and his genuine concern that things be completed right the first time. I have and will continue to recommend the use of Jim's services to my clients and I would respectfully suggest his skills would be beneficial to anyone planning any type of renovation, modification or addition to their home.
